Hypothesis

- Null Hypothesis as Ho : There is no difference in diameters of cutlet between two units. (μ1 = μ2)
- Alternate Hypothesis as Ha :There is a significant difference in diameters of cutlets between two units (μ1 ≠ μ2)

2 Sample t test is applicable

Assumptions

At 5% Significance Level : compare p_value with 0.05

- If p_value is > 0.05 ==> Accept Null Hypothesis
- If p_value is < 0.05 ==> Reject Null Hypothesis

Here,

```
p_value = 0.4722 is >  0.05
Accept Null Hypothesis i.e. μ1 = μ2
Thus, there is no difference in diameters of cutlets betwee
n two units
```
